## Digimatic Indicators

Comparison measuring instruments which ensure high quality, high accuracy and reliability.

## ABLOLUTE Digimatic Indicator ID-CX SERIES 543 - Standard Type

- Employing the ABSOLUTE Linear Encoder, the Signal ID-C always displays the spindle "Absolute Position" from the origin at poweron.
*1 Regarding origin setting, refer to "Origin Setting of Digimatic Indicators" on page F -18.
- Thanks to the ABSOLUTE Linear Encoder, reliability has been increased due to elimination of over-speed errors.
- Tolerance-judging measurement is available by setting upper and lower limit values.

Tolerance judgment result can be enlarged.

- Battery life of approx. 7,000 hours in continuous use has been achieved with only 1 pc of battery.
- Equipped with a data output port that enables incorporation into measurement networking and statistical process control systems.

## - Large LCD

The large LCD incorporates 11 mm characters giving 1.5 times the character area of conventional products (which display 8.5 mm characters) making measurement values much easier to read.

## - Three large buttons

The popular three-large button design, which is used in products such as the ABS coolant proof Digimatic indicators ID-N/B, makes buttons easier to press and operations easier to perform.

Count direction switching, tolerance judgment setting, resolution switching, scale factor setting, and function lock setting

- inch/mm conversion
(inch/mm models)

## - $330^{\circ}$ rotary display

The display can be rotated $330^{\circ}$, allowing use at a position where you can easily read the measurement value.

## - Calculation: $\mathrm{f}(\mathrm{x})=\mathrm{Ax}$

Mounting the ID-CX on a measuring jig and setting the calculation factor (to any value) allows direct measurement without using a conversion table and improves measurement efficiency.

Usage example
Note: The measuring jig is not supplied with the ID-CX.

## - Function locking

Ensures reliability of measurement by locking the settings to prevent preset function settings from being changed by mistake.
